Release note for JRC GX60 JUE-60GX AIM&BIM&ACU

JRC has released new software 0018 for JUE-60GX AIM&BIM&ACU.

Changes in software 0018

Bug fixed

None

Improvement

- SSH / SSL upgrade to support CM 3.2.1.0

Updated OpenSSH and OpenSSL versions to support Core Module (CM) 3.2.1.0. OpenSSH has been updated from "5.7p1" to "6.1p1", and OpenSSL has been updated from "0.9.8o" to "1.0.2p". However, this change is for JRC maintenance connection only and does not affect the GX network even if the software is less than 0017.

- Added function to indicate ADE impact alarm

Added the function to indicate an Impact alarm when a strong impact acceleration occurs on the antenna. LED blinking indicates in real time. Impact alarm operates when a strong impact is accumulated for 24 hours or more and is saved in the log.

Known issues
